Venowave technology

Midwest Bone & Joint Center

"The Center for Sports Medicine, Orthopedics and Rehabilitation"

D. Christopher Main, DO
Board-Certified Orthopedic Surgeon

"The most wonderful feature is no need for electricity. Going to the bathroom or just moving around is so much easier than having to undo everything. For example, I had them on for 10 hours yesterday without having to touch them. The rechargeable batteries are easy to use and they charge quickly. -Patient

Compact design allows for comfortable use all day whether you are recovering at home or on the go:

Simple Application
AA Batteries
Lightweight
Quiet
Comfortable
Mobile

dvtlite
Venowave technology

dvtlite Venowave technology

Venowave technology provides innovative and cost-effective therapeutic solutions for pain, vascular conditions, prevention of deep vein thrombosis and wound healing intervention. The Venowave compression pump is statistically proven to prevent DVT from occurring in patients.

Common Uses

Prevention of deep vein thrombosis (DVT)

Management of symptoms of post-thrombotic syndrome (PTS)

Prevention of primary thrombosis

Treatment of leg swelling due to vascular insufficiency

Enhancing blood circulation

Benefits of Use

- ◆ Life-saving: Significantly reduces DVT complications
- ◆ Comfortable: Easy to wear under loose clothing, breathable cuffs
- ◆ Lightweight: Weighing 0.5 lbs
- ◆ Compact: 7.5" x 4' x 2"
- ◆ Drug Free: Uses a peristaltic pump for wave motion
- ◆ Simple to use: One switch, two speeds
- ◆ Practical: Compatible with everyday activities
- ◆ Therapeutic: Wave-form technology massages leg
- ◆ Affordable: Qualified for medical insurance claims
